RHEWUM Load-Out Screens for SAMUR

ThyssenKrupp Industries India Pvt. Ltd. ordered for the consortium consisting of Mitsubishi Heavy Industries, Ltd., Apex Energy Sdn. Bhd. and PT Industri Rekayasa two new RHEWUM screening machines of the type DF 390x600/1 and two vibrating feeders type AV 3900. The machines have been developed specifically as load-out screens for Urea granules. In order to fulfil these tasks, the screens have a capacity of 1120 t/h.

End customer of the project is company Petronas Chemicals Fertiliser Sabah Sdn. Bhd. Sipitang in Sabah. Its sister company, Petronas Fertilizer Kedah, already operates with various RHEWUM screening machines and could achieve sustained success with the proven and innovative RHEWUM technology.
