

AmmoniaKnowHow.com is launching Fertilizer Academy

[Fertilizer Academy](#) is the online training platform for the fertilizer industry. Its mission is to share the industry experience, avoid operation mistakes and prevent process incidents.

Fertilizer Academy training courses are prepared by an independent group of senior specialists with extensive experience in designing, constructing, commissioning, maintaining, and operating ammonia, urea, nitric acid, and ammonium nitrate plants. We are not affiliated with an EPC organization or technology licensors, and without any corporate constraints, we develop our training courses based on real-life experience and case studies.

With careers dating back from 1975, we can now share our expertise with the younger generations thanks to the latest technologies. Fertilizer Academy training courses cover subject areas like Ammonia and Urea Plant Operation, Process Safety, Incidents and Case Studies, Corrosion and Material Selection, High-Pressure Equipment, and others.

Custom-made training courses for fertilizer companies are available upon request. Subtitles in various languages can be developed, making our training courses available to all operators and engineers worldwide.

We can also organise in-house training programs Contact us for more information about in-company training or customised training programs to meet your organisation's specific learning needs.

Finally, you have the word to say in what Fertilizer Academy offers next – please do not hesitate to contact us, we will be happy to discuss future training.
