Subject: FIFTH SINGLE-TRAIN 60,000 TON/YEAR MELAMINE COMPLEX IN A ROW AWARDED

Eurotecnica, the technology arm of Proman Group, a global leader in natural gas derived products and services, are in the position to announce the award by Yankuang Group of a contract for the licensing, engineering and procurement of the 24th melamine plant based on proprietary Euromel® Technology.

This new project, the fifth in a row single-train 60,000 ton/year plant capacity, lifts the total licensed nameplate capacity to 860,000 ton/year.

Yankuang Group is one of the largest coal & chemicals corporations in China and this new project features the proven single-reactor arrangement, the traditional total-zero-pollution concept, and it incorporates the latest technological improvements for a further reduction of energy consumption.

Euromel® Melamine once again confirms being the leading technology selected in Asia, the Middle-East and the Americas.
