## **FOURTH SINGLE-TRAIN 60,000 TON/YEAR MELAMINE COMPLEX AWARDED**

Eurotecnica is pleased to announce that they have successfully concluded a negotiation with the Chinese ShaanXi Qing Shui Yin Quan Coal Industry Development Co., LTD. with the award of the 23<sup>rd</sup> Euromel® Melamine Plant, which lifts the total licensed nameplate capacity to more than 800,000 TON/YEAR.

No other melamine technologies are so spread across the globe as Eurotecnica Group's proprietary Euromel® Melamine.

The new project has a nameplate capacity of 180 TON/DAY (60,000 TON/YEAR), it is based on the notable 4<sup>th</sup> generation Euromel® Melamine Technology, it features a single-train arrangement as well as the traditional total-zero-pollution concept.

With 40 years of experience in the melamine, Eurotecnica has transformed the melamine business, from a market with few players to a worldwide open market.

Euromel® Melamine is the only technology selected in the Middle-East and the leading technology in Asia and in the Americas.
