

## **ANWIL WILL BUILT A 1500 TPD NEW AMMONIUM NITRATE GRANULATION PLANT WITH CEAMAG PROCESS.**

ANWIL awarded a EPC contract to Tecnimont SpA, Italy, for the construction of a new plant able to produce Ammonium Nitrate based Granulated products.

The plant will be able to produce several types of formulas. The process, based on spherodizer technology, is design for the production of more than 1500 tpd of granules in a single process line.

CEAMAG of France has been chosen as Licensor for the supply of the technology, Basic Engineering Services, supply of key equipments and supervision of the plant commissioning.

The start-up is scheduled on second half of 2022.
